Information Disclosure Statement

The information disclosure statement filed January 26, 2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because one of the references "Swamy et al." has no date. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(i) & 37 CFR 1.84(p) because lines, numbers & letters are not uniformly thick and well defined, clean, durable, and black (poor line quality). Also, some characters are too small.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 39, 40, and 41 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is

Art Unit: 2819

required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 42 is objected to because of the following informalities: on line 1, the word, “architective” appears to be --architecture--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 38-40 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Agrawal et al. (US 6,191,612 B1).

Regarding claim 38, Agrawal et al. discloses, in Fig. 1, an integrated circuit comprising:
a plurality of logic areas (VGB); and
an actively switchable network (SwBx; col. 6, lines 57+) selectively connecting one logic area with another logic area.

Regarding claims 39 and 40, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Art Unit: 2819

Regarding claim 42, Agrawal et al. discloses, in Fig. 1, an integrated circuit having an architecture comprising arrays of logic-gates or logic-blocks (VGB) and an on-chip packet-switching network (see col. 6, line 30 - col. 7, line 33).

Allowable Subject Matter

Claims 1-37 are allowable over the prior art.

Claim 41 would be allowable if the claim objection is corrected.
